## IRMA IS CENTRE OF TRADING AREA

Crowds Gather Here Saturday Night  
for Shopping and Neighboring  
Visiting Around.

Despite general depression among farmers due to adverse weather conditions, Saturday night in town continues to be a high spot in the week. Farmers from miles around come in town to do their trading at the stores and visit among their friends whom they meet here.

Somewhere there is nothing to compare with the warmth of community interest on this night. There is an old fashioned "neighborliness" that never will go out of date and that has only been intensified by automobiles that make the trip to town a pleasure for every family. At this time of the year few farmers come to town in the afternoon, but along towards sundown, shortly after supper, the parking places along main street are crammed with cars, and the streets must be resorted to for parking purposes, these filling up far down the line. The farmers are coming to town for their week-end shopping, and their week-end relaxation from work in the field or the dairy barn.

Following a custom of long standing, the stores all stay open, that the ladies may be replenished for Sunday and the first part of the week, or the dress goods for Mary's new dress may be picked out. The aisles are filled with men, women and children. Shopping is not the goal so much as the exchange of greetings, the salutation of friends seen after the lapse of a few days, the interested sizing up of newcomers. This is the time for women to exchange their gossip, and for men to speculate upon conditions of the soil and the tendency of business. Everyone in the town and nearby territory seems to be there. Young couples push baby carriages. Gay young bloods pick out their girls for the movies, who appreciate the fire entertainment offered. Older heads meet in a fraternity of friendships which knows no irritants.

Along about nine thirty the farmers who live at the greatest distance gather their families and the autos begin to leave. In another couple of hours the streets are practically cleared. The Sabbath morning will find them silent and deserted. The week-end foregathering has been held. Affairs of state and nation, as well as the problems of the individual and the family have been settled. Everything is at normalcy — until next Saturday night.

## INITIAL PAYMENT OF POOL 60 CENTS FOR 1930 WHEAT

Winnipeg, Aug. 25.—The initial payment to be made to farmers for their 1930 wheat crop by the western wheat pools will be 60 cents per bushel, basis No. 1 northern, Fort William, it has been decided by officials of the three western pools who have been meeting here for several days discussing the important question of "with representatives of the banks which will be involved in financing the crop."

While the official statement as to the amount of the initial payment will not be made until Tuesday, it has been learned here on good authority that the 60 cent figure proved satisfactory to the pool interests and to the banks. Included also in the financing arrangements is a 15 cent margin which brings the total possible advance by the banks up to 75 cents, but the 15 cents is regarded as a margin of safety not to be drawn upon except in case of a very serious slump in the market.

Announcement of any further particulars of the financing of the year's crop will await the official statement which A. J. McPhail, president of the western pools, is expected to make this week.

## NOTICE — NOTICE

All students in Irma Rural High School District who plan on attending school are requested to notify the secretary. This information is asked for, that the board may know how many non-students to admit.

## SPECIAL SESSION IN TWO WEEKS

New Premier Is Going To  
Have Busy Time Before  
Leaving for London.

Ottawa, August 27th.—A session of Parliament which will set a new record for brevity is planned by the Bennett Government to implement Mr. Bennett's pledge to deal forthwith with the unemployed problem. While the date of convening the session cannot be fixed until it is known whether the return of ministers will be opposed in by-elections, it is the intention to bring the members together at the earliest possible date in September. The speech from the Throne is expected to deal only with the business of the session, which is unemployment, and it is the decision of the Government that the entire session need not exceed two weeks in length.

Another suggestion was that a regular session be called and the House adjourn until after the New Year as soon as emergency legislation was passed. This has, it is understood been rejected in favor of the two-week sitting for which members will draw only the statutory allowance of \$25 per day.

The legislation to be presented will include provision for co-operation with the Provinces and municipalities to forward public works which might otherwise be postponed for a year or two. A considerably expanded program of Federal public works is also indicated.

Those courses are aimed at the temporary relief of unemployment. The broader policy advocated by Mr. Bennett in his campaign strives to reach basic conditions through agriculture and industrial encouragement. This hinges upon tariff adjustments of a controversial character and specific action will depend largely upon the course of events at the economic conference in London. Hence tariff adjustments beyond probable suspension of countervailing duties not be taken up by the emergency session of the House.

Advance reports do not indicate that the Liberal party will put any impediment in the way of quick disposal of business to enable Mr. Bennett to go to the Empire Conference. In fact Mr. King has indicated his readiness to facilitate matters except where his party might find itself in conflict with the administration on vital principles of government.

## DAYSLAND-CAMROSE HIGHWAY RAPIDLY NEARING COMPLETION

The grading of the government highway paralleling the C.P.R. tracks between Daysland and Camrose, is nearing completion. At present the outfit is working only about half a mile west of Daysland and the grading is completed east from Camrose to this point.

It is understood that the travelling of this highway will be done early next spring.

When this is done Daysland will be among the towns fortunate enough to be situated upon a highway that connects up with other first class highways leading to the capital city of Edmonton, Calgary, Banff and Lethbridge and on down to the United States boundary where these connect up with coast to coast highways. —Daysland Commercial.

## EPIDEMIC OF INFANTILE PARALYSIS

With an epidemic of infantile paralysis sweeping the southern part of the province, emergency supplies of serum are now being distributed at strategic points. Dr. A. C. McGugan, provincial medical health inspector, stated Monday. Although no new cases of the malady have been reported since last week, supplies of serum have been distributed to Drumheller, Lethbridge and Hanna in case of emergency. Calgary, Medicine Hat and Edmonton already have supplies on hand.

When in Banff, stop at the Homestead Hotel and meet your Alberta friends. Ask to see the last edition of the Irma Times and get the latest news from home.

## WEEKLY REVIEW PROV. MARKETS

Markets as Reviewed by the  
Market Examiner, of Calgary,  
for This Paper.

**CATTLE**  
Beef—Edmonton reports that the market during the past week has been on the slow order, with prices easier. Choice heavy steers made from \$5.50 @ \$5.75; choice light \$5.25 @ \$5; good \$5.25 @ \$5.50; medium \$4.50 @ \$5; and common kinds at \$3.50 @ \$4.25.  
Feeder-Stockers—Trading in this market has been moderately active, with feeder steers bringing \$4 @ \$5; stock steers \$3.50 @ \$5; stock heifers \$3.50 @ \$4.50; and stock cows \$2.50 @ \$4.00.

**HOGS**  
Edmonton reports the price on hogs as \$9.75, fed and watered basis, with select at \$10.25 and the butchers at \$9.40.

**SHEEP**  
Edmonton reports that trading is quiet. Yearlings bringing \$4 @ \$5; ewes \$2.50 @ \$4.50; and lambs from \$6 @ \$7.50.

**BUTTER**  
Creamery Butter—Make holding up very well. Stocks in storage increasing and shipments being made to coast. Prices steady and no change anticipated. No. 1 cartons, 32c; No. 2 cartons, 30c; No. 1 prints, 31c; No. 2 prints, 29c.

**POULTRY — EGGS**  
Poultry—Fair supply being handled, consisting of broilers and fowl. Bulk of birds in good condition. Demand slow, but appears sufficient to clean up offerings. Prices steady: Fowl quoted from 10c down, with broiler at 12 @ 13c.

**EGGS**—Receipts light and quality not very good. Large percentage of seconds arriving; demand only fair. Prices steady at, extras, 22 @ 24c; firsts, 20 @ 22c; seconds, 18 @ 20c.

**HAY — OATS**  
Hay—Offerings from country fairly liberal, but movement slow owing to light demand. Quality very good. Believe upland cutting finished, while timothy cutting in full swing. Upland quoted at \$17 per ton at country points.

**OATS**—Market slightly easier, quoting 38 @ 40c per bushel. Receipts light, but sufficient to handle all orders.

**HIDES**  
Market very weak, although prices so far have not been changed. Country offerings very hard to move. Quality good. Tanners purchasing packers skins.

**WOOL**  
Situation unchanged as far as demand concerned. Receipts light, but it is believed that large operators have already marketed their supplies. Quotation of 7 @ 8c prevails.

## COARSE GRAIN POOL SUSPENDS

Calgary, Aug. 22.—Alberta coarse grains pool directors issuing an official statement on Friday, announced that the Pool would suspend operations for the present crop season. The statement was as follows: "The board of directors of the Alberta Wheat Pool have decided to suspend the operations of the Alberta Coarse Grains Pool for the current crop year. Pool Elevators, however, will handle coarse grains delivered by Pool members on a cash basis."

## FOR SALE AT A SNAP

12 x 20 Ramely Engine, 22 x 35 Rumely Separator, with good belts. This outfit with a little care would do threshing on section or more for the next 10 or 12 years.  
E. T. McDowell, Agent. Irma, Alta.

## HARVESTING NOW WELL UNDER WAY

Issued by the Department of  
Agriculture, Edmonton, Alberta,  
August 23rd, 1930

Wheat cutting is well advanced in the southern part of the Province, general in the central area and has commenced in the northern districts including Peace River.

In the south-eastern area the quality of grain is high but the yield is uniformly light. Farther west crops on summerfallow are giving returns of from thirty to thirty-five bushels per acre. On all spring prepared land the yields will not be large. Irrigated areas report all crops slightly above average.

In the central eastern part of the Province all grains have suffered severely from wind and drought. Crops are short and in many instances ripening is uneven. Late rains have caused excellent growth on fields reseeded to oats and barley and there will be a fair supply of feed. There have been several rather severe hail storms in this area which have caused heavy losses.

In the western and northern areas prospects are satisfactory in quality and yield. The recent dry period in the Peace River district has slightly reduced the yield of oats and barley. Wheat has not suffered.

Rains have been general over most of the Province in the past few days and pastures are much improved. Sugar beets and potatoes are making excellent progress.

## STORK BRINGS PRINCESS TO ROYAL HOUSE

Glasgow, Scotland, Aug. 22.—This was a day of great festivity for the good people of Glasgow and Forfar and of great rejoicing for all Britons, honoring the new daughter of the Duke and Duchess of York, fourth in line of the British royal family, born last night.

The little princess is the fourth grand-child of the king, her own sister, Princess Elizabeth and Princess Mary's two sons having preceded her into the world. She is fourth in succession to the throne; her uncle, the Prince of Wales, her father, and Princess Elizabeth all are in precedence.

British dynasts had hoped the child, who had been expected for days, would be a boy, thus insuring a direct male succession to the throne after the Prince of Wales.

## NOTICE

A complete check up is being made in the district with regards to motor vehicles. The public are requested to carry their drivers License with them whilst operating their cars. Also see that their cars are carrying proper plates as specified by the Motor Vehicles Act. This being for the public safety and will give a better opportunity in keeping under close observation, alleged suspects and undesirable in the district.

## MAKE YOUR HOME MORE A-

## TRACTIVE THAN THE

## STREET CORNER.

What are you doing to make your home more attractive to your boys at night?  
Are you allowing them the freedom which youth must have to be happy?  
Are you providing them the sort of musical instruments which they like?

Musical instruments have saved many a boy from the corner gang. If you want your lads interested in the finer classes of amusement begin now.

Authority tells us that the taste for either good or bad quality in music is formed before school age. Are you singing or playing the class of music you wish your children to enjoy?

If your son learns to play a musical instrument or becomes a singer he has an opportunity to meet and mingle with a better class of people as a rule and thus imbibe a spirit which carries him on to respected manhood.

But you hate practicing. You are too nervous.  
There is a real live boy there is bound to be a noise.  
He will find vent for his spirits somewhere. Let it be at home.—Copyright.

Service on the first Sunday of each month at 11 a.m.

## THE NEWS WE WANT.

The following is taken from one of our exchanges: One of our correspondents wants to know the kind of news he wants. He says: "I want news below which will be of much assistance in writing news to the paper. It would be a good idea to cut it out and keep it in mind."

Births, deaths, accidents, robberies, marriages, land sales, school news, church news, confagurations, visiting abroad, public meetings, family reunions, society meetings, real estate sales, condition of crops, visitors from abroad, anything of general interest, something good about people. Remember when sending in news for publication, we want them to cover the following: Who? What? Where? When? How? Also remember that the contributor must sign his name to all items sent in.

## PLAN TO KEEP BEES BUSIER

Ottawa, August 19.—The busy bee is going to be busier than ever if science has its way. Ancient literature, telling of the adaptions of honey to suit the varying tastes and needs of past centuries, provides clues which scientists are now following to revive old uses and to develop the present possibilities of the product.

The early Romans in their writings often mentioned the honey bee and honey. Among the products they mentioned frequently are water honey, salt water honey, water mead, rose honey, honey foam and honey vinegar.

The chemical properties of honey and the methods of inducing chemical changes is now being studied and it may open the field for new honey products. Specialists are perfecting methods of making honey candy and some manufacturers already have secret processes for making this confection.

Many housekeepers now use honey to sweeten beverages, cereals and cakes in general cooking. It is also used as a syrup on waffles and hot cakes. Eminent physicians proclaim that honey contains the most beneficial of the sugars.

Heard at the poker party: "What's the matter, you look terribly thin?"  
"My wife's on a diet."

The honeymoon is over, says a careful observer, when they decide to eat onions again.

Heard at the ladies social: "Have you heard the awful story about Mrs. ....?"  
"Heard it? Why, my dear, I originated it."

## WHEN AUTUMN WINDS BLOW CHILL

It is time to consider the condition of your Fall and cold weather garments. It is not too early to send them to us for renovating.  
Fur trimmed coats should be dry cleaned and moth-proofed at the beginning of the season before any harm has been done. Our repairing and altering departments can also assist you in maintaining your wardrobe at its highest standard. A special department is maintained for our out-of-town patrons.

## HER FAT IS MELTING FAST AWAY

All over the world Kruschen Salts is appealing to girls and women who strive for an attractive, slim, and graceful figure that cannot fail to win admiration.

Here's the recipe that banishes fat and brings into blossom all the natural attractiveness that every woman possesses.

Every morning take one-half teaspoon of Kruschen Salts in a glass of hot water before breakfast.

Be sure and do this every morning for "It's the daily dose that takes off the fat." Don't miss a morning.

Kruschen daily means that every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

At the same time the stomach, liver, kidneys and bowels are tuned up and the pure, fresh blood circulating.

Nature's six life-giving salts is carried to every organ, gland, nerve and fibre of the body, and the result is that "that Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

### CHAPTER XXVI.—Continued.

"I don't want anything but a cup of tea, dottie, and maybe a slice of toast. I remember Edward Howard saying that old folks don't need much come night. And—see here, childy—the doctor told me about your plans and everything. I guess he thought he'd save you the trouble, and you're not to worry about me. I've always thought it would be kind of fun to live in a small house, and I'll be a sight easier for you. I'll be easier for me, too, not to go over the stairs come night. Besides, I'll be able to see a half block farther down the street from that window! And it's going to be wonderful, having you home all day. You needn't worry a mite about how I'll take it, Charman. Between you and me, dottie, I think it's going to be fun!"

Only after the girl had turned away, undetected, and unable to speak at this display of bravery, did the old lips tremble.

"Thank God that's over," murmured Grandma brokenly, while two big tears crept slowly down over her wrinkled cheeks.

### CHAPTER XXVII

There were times during the days that followed when Charman found it difficult to believe that she and Grandma would ever leave the shelter of the homestead. They seldom talked about it, but when the impending changes could not be ignored, the old lady spoke cheerfully, stoically refusing admittance to the tears that lay so near the surface. Only when she was alone did her face show any of the dismay that filled her tired old heart. These were hard days for Grandma Davis.

"Seems somehow as if she'd grown smaller—shrunken, you might say," commented Lizzie Baker to Salina Knowles. "It ain't easy to make changes at Grandma's age; and she's keepin' up before Charman more'n's good for her. And I'm sorry for Charman, too. I ain't ever see a young person that set such store on anything old as she does on that old house. I declare, Salina, there's times when I wish whoever's buyin' it would back out of his bargain."

But Miss Lizzie was not to get her wish. It was the last day of August when George K. hailed Charman as she passed the bank, and led her into the little room which had a formidable "Private" on its door, but which was in reality no more private than the air we breathe, because only on rare occasions did the president of the Wickfield National close his door. He closed it now, however, and asked: "What you been up to this afternoon?"

Charman smiled as she responded: "Why all this privacy? I've been to

the library, as you might deduce from this array of books. But I got more than the books, Uncle George. I got a job! Miss Garfield has asked me to help at the library two hours each afternoon. Isn't that wonderful?"

"I can easily leave Grandma that long; or get Miss Lizzie to come in and sit with her; and it will bring in a little money. It was Gam's idea. I'm going to stop at his office now and thank him."

"Well, that's fine!" George K. spoke cheerfully. "I'll do you good to get away each day and see folks. What I called you to in for, Charman, was to say that you can sign the deed at ten o'clock tomorrow. I just got word that your man will be here then, and wants to see you. I told him to come to the bank—thought maybe it would be hard for Grandma to see the act done, as you might say. I'm thankful now, child, that she decided the place to go. It would be hard for her to sign the house away. There, Charman, if you feel like crying, cry on my shoulder; but I advise you to look up the long run most things come out right in this old world. If I didn't believe that truth I shouldn't be as happy as I am, or as fat, either!"

"Or so helpful to the rest of us," added Charman. "It's all right, Uncle George. I did my crying long ago, and have since acquired such a stiff upper lip that it sometimes hurts! But as Grandma's probably hurt a great deal more, I don't complain. I'll be here at ten. Now I must run up and thank Gam Garfield for his suggestion, and then skip home. Thanks for everything!"

"Haven't you forgotten something?" asked George K. as she reached the door.

Charman turned, her eyes aglow with sudden merriment. This was an old joke of childhood's days, when as a little lass she often slipped into the room marked "Private," in search of the wee pink checkermints which George K. used to tell her "grew in his pockets." If, in those days, she forgot to bestow upon him a grateful kiss, he reminded her thusly and was rewarded by a sometimes strangling embrace. She came back now, laughing as she kissed him. Then the door closed behind her, while George K., watching from a window, saw her cross the street and start up the narrow stairs that led to Gam Garfield's office in the building opposite.

"My Bill must have been crazy when he let that girl slip through his fingers," he complained to the four waiters. "After all, she's well that ends well, and I hope."

What he hoped was interrupted by a fellow banker from Eastboro, who was as everybody's custom, walked in minus the formality of a knock.

Charman, finding Gamaliel busy with a client, delivered her thanks briefly and moved on up Main Street, "bagging" feet. No need to tell Grandma that the dread day was at hand, she thought. Let her sleep in peace this last night under her own roof. As for herself, she would swallow that lump in her throat and remember, as George K. said, that things usually turn out all right. It was wonderful that Miss Garfield needed help at the library just now. She must write Jim about it—if ever he answered her last letter. Miss Lizzie's latest bulletin from California had brought news that he had "a girl." Perhaps he was too busy playing "tag" with her to write to "the girl he left behind him," thought Charman whimsically, and, having reached the house, stopped to look up at the carved pineapple above the door.

"I hope they'll give it the cost of gold leaf it deserves," she said, and went inside, her boots on the table by the door, and then stood still, staring into the room that had been a shop for almost as long as she remembered.

"Haven't you a word of greeting for the returned prodigal?" asked Jim Bennett.

He arose from where he was sitting beside Grandma, and caught Charman's hands in both of his.

"Steady!" he said. "Folks have been known to expire of shock. I'd have warned you of my arrival but I started at a moment's notice, almost. Sit down, Charman, and catch your breath."

He pushed her gently into the rocking chair, and drew up a straight-backed old Chippendale for himself. In a sort of daze Charman heard her grandmother say anxiously: "Hadin' you better get her a drink of water?"—and at that she laughed.

"I'm not fat," she protested, "merely struck dumb, as you might say, Jimmy, you look—well—"

"Different, doesn't he?" put in Grandma; and Charman, noticing her for the first time since this amazing homecoming, saw that her sweet old face looked happier than it had for days. "He's got a sort of air about him," she was saying. "I saw it right off when he came in. He looks—stylish."

"Gosh!" breathed Jim. "You talk

## LUMBAGO?

A pain in the lower part of your back can torture you. But not for long, if you know about Aspirin! These harmless, pleasant tablets take away the misery of lumbago, rheumatism, neuralgia, headaches, toothaches, and systemic pains of women. Relief comes promptly; is complete. Genuine Aspirin cannot depress the heart. Look for the Bayer cross, thus:

like my mother before she fell in love with a fruit ranch."

Charman laughed, spontaneously, and Grandma asked: "You mean you're playing second fiddle these days?"

"Something funny near it," grinned Jim. "Will you believe it, Grandma, my doting mother hardly noticed when I deserted. I left her sampling a new variety of citron. Gosh! It's good to be home!"

"Then you haven't fallen in love with—?" began Charman, when Grandma interrupted in horrified reproach:

"What do you mean, child, asking such a question?"

"I was only going to say in love with California," explained the girl, and Jimmy roared.

"No," he replied, after her mirth had somewhat subsided. "I didn't lose my heart to—California! It has its good points, of course. Mother and Aunt Sophie are nuts over it—boast. I call 'em; but as for me—I wouldn't swap one of Wickfield's winding, elm-shaded streets for the whole darn state of California, and that's the truth!"

"There!" ejaculated Grandma with satisfaction. "I always said that there's not a prettier spot on earth than Wickfield. Here comes the doctor, Charman. He seems to be in a hurry. Maybe—"

But with haste that seemed to both Grandma and the young man rather uncalled for, Charman sprang up, and was at the door when John Carter reached the steps. She did not guess that in the moment that followed, both those loyal hearts in the room beyond were to be wrenched almost to the breaking point. She did not realize that the front door was reflected in the long mirror that hung beside it, nor would it have troubled her, if she had known. All she saw or thought of was the light in John Carter's eyes as he thrust a scrap of yellow paper into her hands. She read the message and looked up, her lovely face reflecting the happiness that shone from his; and the next moment he caught her in his arms and kissed her, rapturously, exultantly.

## If baby has COLIC

A CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

Is always a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

—Fletcher's—

CASTORIA

## Advertising England

No Country in the World That Offers Greater Attractions

Britain, as Kipling said of Lord Roberts, "doesn't advertise." Sir James Parr, late high commissioner for England, has been telling the advertising men in London, that "Englishmen are too reticent."

Why, he asks, should it be "bad form" to talk about themselves and their country, especially when, as he says it, no other can compare with it in point of "human interest?"

What country has such wealth of historical places, such cathedrals, such homes both great and small? he wants to know. And as for England's countryside in springtime, he says, "there's nothing on earth to equal it's beauty."

Naturally, England and its chief town, in spite of a lack of capacity for advertising, seem to be fairly well-known abroad. Consider London just recently.

It was packed with distinguished visitors. They ranged from the King of Siam, to a military attaché, and Prince Danilo, of Montenegro, to the newspaper editors of the Empire, the latest tennis celebrity and the newest contestant for the Henley regatta.

They came from all parts of the world. The secret of it, of course, is that nowhere can you find such a round of entertainment, enjoyment and amusement packed into a few short months as you find in Britain during the "season."

You can have everything from grand opera to yachting, from the Royal Academy to a military tattoo, from a court levee or drawing-room to a golf championship, from a regatta to a flower show. There is hardly a day when some function or colorful event does not help to fill the social diary.

Naturally, it costs a great deal to share in these delights. You can spend from \$50 to \$150 a day at a luxury hotel in London. And if you take a fashionable flat to be in the centre of things you can hand out \$500 a week to your landlord who still thinks he is obtaining only his just dues.

Should you be in the millionaire class, you can live even more expensively. You can take a furnished house in the West End. It will be the last word in style and comfort—all ready to walk into. A thousand dollars is not a fortune, and at all exorbitant for such a temporary shelter.

## Active At Old Age

Budapest Cabman Is Still Persuing Occupation At the Age of 89

When should a man retire from active life, and how should he do it? A Budapest cabman thought that about 80 was a good age at which to stop work, but determined to do it "with a flourish." He drove his cab all over the continent, and attracted a good deal of attention by calling his passengers correctly by name. The last horse cab in Europe. Then, on his return, he presented the cab to the Budapest Museum. But he wasn't allowed to retire. The municipal authorities were so impressed by his adventurous spirit that they presented him with a taxi-cab. And now, though he is over 80, he is touring Europe once more—this time in the taxi. Old men are certainly more enterprising than "graybeards" used to be. Eastern Europe seems to specialize in these adventurous oldsters.

## Oriental Poppy

New Bloom Is Developed By Resident Of Ontario, B.C.

An Oriental poppy, developed from a seedling by E. W. Neel, of Duncan, B.C., has been given an award of merit by the Royal Horticultural Society, and assigned the name "Covinchian" after the district in which it originated. The large blooms grow from 10 to 12 inches across on stalks over 4 feet 6 inches. The color of the flower is dark red. The seedling appeared voluntarily in Mr. Neel's garden, and he developed it.

## U.S. Cost Of Living

The United States Department of Labor, through the bureau of labor statistics, has issued a report on changes in the cost of living in the United States in recent years, which shows a decrease of 2.1 per cent. between June, 1929, and June, 1930. The information given is based on prices actually obtained from merchants and dealers in 32 representative cities.

Radio so far appears to be a failure in India. Atmospheric conditions and lack of interest of a large portion of the people are two reasons, but the principal one is said to be the tax on receiving sets.

New South Wales, Australia, has banned all curb gasoline pumps.

Minard's Liniment for Lumbago and Neuralgia.

## WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. H. F. Stewart, Finsbury, Bask, writes:—"Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Millburn Co., Ltd., Toronto, Ont.

## Explore Arctic With Submarine

Sir Hubert Wilkins To Cross Polar Regions By Undersea Passage

Sir Hubert Wilkins, arriving in New York from the North German Lloyd liner "Bremen," announced that he had virtually completed plans for his undersea passage in the North Polar regions, which he will undertake next summer in an obsolete submarine, which will be placed at his disposal by the Navy Department.

He gave details of his plans to examine the discarded submarine O-12, which he plans to rechristen the "Nautilus." In this out-of-date craft, Sir Hubert, with several other scientists and a crew of 18, will explore beneath the ice-choked waters for a period of about 50 days. Sir Hubert expects to cover some 2,500 miles during this period. The submarine will be equipped with an ice-cutting device that will bore a hole upward, when the submarine's super-structure is close to the bottom of the ice floes. He will thus be able to send men to the surface of the water through the ice to conduct experiments and make observations.

The submarine will attain the speed of between three and four knots, when submerged. He expects to leave New York next month. Sir Hubert plans to broadcast daily with a special radio set. The submarine is 175 feet in length. Among those who will accompany the explorer on his Polar voyage will be Dr. H. V. Sverdrup, who accompanied Amundsen on several expeditions, and Dr. Beining Meindert.

Choked For Air. Some little irritant becomes lodged in the bronchial tubes, others gather, and the awful choking of asthma results. Nothing gives such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing smoke or vapor penetrates, cleans the passages and gives untold relief. It has behind it years of success. It is the sure remedy for every sufferer.

## Increased Wheat Consumption

Strong Tendency Of Tropical Countries To Use More Flour

A report issued by the Ford Research Institute, of Stanford University, California, shows a strong tendency, towards increased wheat consumption in the most of tropical countries. The survey covers the years from 1909 to 1927, and reveals a growth in the consumption of wheat flour in excess of the growth of population; the years from 1909 to 1913 showing an annual average per capita use of 1.24 pounds of flour, while the period from 1913 to 1927 shows a rise to 1.27 per cent.

## Keeping World Supplied With Paper

The forests of Canada continue to be the chief source of the world's paper supply. During June, Canadian paper was exported to 33 countries, ranging alphabetically from Australia to Uruguay.

On a London rifle range a woman, who had never handled a rifle before, hit the bulls-eye with fourteen of her fifteen shots. It is not known what she was aiming at.

Excess acid is the common cause of indigestion. It results in pain and sourness, and is usually relieved by eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## A Valuable Stamp

One Cent Stamp Issued Many Years Ago Now Worth \$10,000

Probably the most classic example of the economic law that scarcity creates value is on exhibition in Boston, Mass.—a one cent stamp worth \$10,000.

It is the property of Arthur Hind, Utica, N.Y., manufacturer, hotel owner and philanthropist, whose \$500,000 collection of stamps constitutes, financially speaking, just about half of the National Philatelic exhibition of 1930, which was opened at Horticultural Hall, in Boston, Mass.

The history of the stamp goes back to 1866, and to British Guiana. The postmaster of that isolated colony had found his supply of stamps exhausted. In the emergency a local printer was called into conference, and, with the aid of a picture of a ship, borrowed from a local newspaper, and a hand-set inscription, the stamp was turned out.

A few days later the regular supply arrived and the makeshift was destroyed. Sixty years later, the only known copy came into the possession of Hind for \$32,000, and today collectors say it is worth at least \$10,000.

## Little Helps For This Week

"Let thine heart keep my commandments."—Proverbs iii. 1.

Rabbi Jehoshua had the skill To know that heaven is in God's will; And doing that, though for a space One heart beat long may win a grace As full of grandeur and of glow As prices of the chariot king.

God would have us live; if we live we cannot but know, while all the knowledge in the universe cannot make us live. Obedience is the road to all things. It is the only way to grow, to love, to know, to love and faith and obedience are sides of the same prism.—George MacDonald.

## Hittite Castle Door

The Chicago Oriental Institute Makes Interesting Discovery

The Chicago Oriental Institute expedition, excavating at Alalakh, has discovered a large Hittite castle door ornamented with bas-reliefs representing deer. The door has been transferred to the Angora Museum. Road builders in Scanlonia recently uncovered a chiseled stone, which aroused the curiosity of a highway engineer. He continued the digging and finally byzantine vases and pieces of money, apparently, deliberately buried beneath the rock, which may mark a treasure trove.

Persian Balm is the one toilet requisite for the dainty woman. Delightful to use. Leaves no stickiness. Softly absorbed by the tissues. Slightly fragrant. Imparts a velvety loveliness to the complexion. Tones up the skin. Soothes and banishes all unpleasant roughness or chafing caused by wind and other weather conditions. Makes hands soft and white. Creates an elusive, essentially feminine charm. Persian Balm is indispensable to women of refinement.

Historical note: When Lincoln was elected to Congress from Illinois his campaign expenses, paid by his party, were 75 cents.

Toronto is to have a seamless-tube mill costing \$2,000,000.

## VIKING

Miss Cora Hind, agricultural expert of the Winnipeg Free Press, was a visitor for a short while in town on Friday. She was completing a survey of the grain situation in the western provinces, and had already covered ten thousand miles by auto, and was on her way into the Peace River country. Miss Hind said that this district from all observations was quite favored this year in comparison with many others she had visited. Machinery and all the accoutrements for the sowing of a test well for natural gas eight miles east and one mile south of Viking are now on the grounds, and operations should start within a few days. The work is under supervision of Mr. S. E. Slipper, geologist for the dominion and also the Northwestern Utilities.

Neighbors gathered at the "Bud" Evans farm, twelve miles west of town on Monday and cut his crop. Nine binders and fourteen stockers were on the job all day and finished about one hundred acres. Mrs. Evans furnished "eats" for the volunteers. Mr. Evans was injured while harnessing a team some few days ago, and to show him that the good old western spirit of helping a fellow when he is down still exists, the neighbors held this "bee" to cut his grain. It is needless to say that "Bud" appreciated the call.

The rainfall in our district has been copious this year. From June 1st to Aug. 20th, the official measurement by Mr. Collier totals 12.06 inches. Such a quantity of moisture during the growing season is much above the average, and accounts for the magnificent fields of grain throughout the Viking district. As each inch of water represents 113 tons to the acre, the total of 1356 tons appears stupendous. The clouds have done a big job for us this year.

H. Boquist who has spent the past two months near Hythe in the Peace River Country returned on Saturday to do some threshing in this district. He states that the Peace River country is booming and settlers are flocking in by train, cars, and covered wagons. The crop at Hythe is one of the best.

Dr. G. M. Little left Sunday for Winnipeg to attend the annual convention of the Canadian Medical Association which opened on Monday. The members of the British Medical Association which are visiting in Canada are also attending the meeting in that city at the same time.

Mr. and Mrs. Royce Gravert are now residing at Marwayne, where Royce has opened up a combined hardware and Red & White grocery store. Royce's many friends in this community wish him success in his business venture.

Try an old Ford tire on your grain wheel and prevent trouble from dirt and grain plugging it up. Farmers in this district have tried it out with success.

Working crews are busy digging holes and setting poles for the Calgary Power Company line between Viking and Bruce. Construction has commenced within the village.

Viking is about the only town where the miniature golf bug hasn't been seen — but some say it will soon be here.

Rain showers early Monday morning and Tuesday have delayed cutting in some parts of the district.

A walk around town will reveal many beautiful flowers and plants, green hedges, trees, and well kept lawns. Possibly a stranger would notice this more readily than home folks, but nevertheless the sight of beautiful many flowers and plants will remain with us when wintry winds blow drifts of snow here and there, and we will await with eagerness the coming of spring again with its flowers and gardens.

In spite of the attraction of a gravelled highway southwest and north of this town, a few tourists are straggling through here each week. It's pretty hard to keep the buffalo park, the great oil and gas field along this line, and the best farming district in Alberta off the map, and the outside world wants to see it.

There's a humming noise heard in every part of the district, and it's a welcome hum too. Yes, the binders and combines are at work, busy as bees.

Edmonton is going to have an air attack from Detroit on September 17th. From reports Chicago is already represented there.

The course grain pool announces it will suspend operations for a year and let the members sell on the open market. That the pool has not reached the idealistic position its advocates and members set for it, is a distinct disappointment to the people of the western provinces in general.

The variety of weeds seen on some farms indicate that even today we have a good deal of mixed farming.

## BREAD PROCLAIMED MOST PERFECT FOOD

Ottawa, August 19th—No food which is singly capable of thoroughly satisfying the body's needs of sustenance exists, but good bread, made of whole grain, probably comes the nearest of all food articles to providing a balanced food diet of satisfactory bulk.

It is a common fallacy in many minds that there exists somewhere in the world an ideal food—some material that will satisfy all the needs of the body and that could this material be found we would be able to save much of the thought and expense of arranging our meals and be freed from the danger of eating the wrong kind of food.

Careful studies of food substances and their effects upon the human body, however, have taught us that there are few substances that contain the portions of protein and fuel foods necessary to meet our needs. A study of the composition of various foods soon discloses a number of important facts bearing upon this pursuit of the ideal food.

If, for instance, you eat enough beef to satisfy the protein needs of the body and eat nothing else, you will have an insufficient supply of fuel. If you eat enough beef to supply the fuel needs of the body you will take in too much protein. On the other hand if you try to live on fruit you will have to eat the equivalent of 39 pounds of apples to supply the necessary protein whereas 9 pounds would supply sufficient energy, but there would be a shortage of protein. Baked potatoes, onions, corn, almonds and bread approach balanced diet but even these fall far short. Potatoes and corn alone would have to be consumed in large quantities to meet the needs.

Taken by itself, good bread comes the nearest to furnishing a balanced food diet of satisfactory bulk. With bread is included a variety of flour preparations such as macaroni, biscuits, Vienna rolls and crackers, but to try and live on these alone would be manifestly absurd.

To meet the dietary requirements of the day it is necessary to combine high protein foods with low protein foods in such proportions as will furnish bulk, the proper nutritive ratio and will, at the same time, suit the taste. Protein foods are mostly of animal origin and foods low in protein are almost entirely of vegetable origin. A balanced ration selected to meet all three requirements, bulk, protein ration and taste is likely, therefore, to contain materials of both animal and vegetable origin.

## J. A. DELISLE FILES APPEAL

J. Amos Delisle, United Farmers of Alberta candidate in the Beaver River riding and sitting member at dissolution, on Saturday morning, through his counsel, P. G. Thomson, K. C., filed formal appeal against the decision of His Honor Judge Taylor in his recount of ballots cast in the Beaver River riding in the provincial general election of June 19 last. Judge Taylor's recount gave the seat to H. H. Dakin, Liberal, by four votes, the totals being 1036 for Mr. Dakin and 1032 for Mr. Delisle.

In his appeal, Mr. Delisle asks for a complete recount, which will be carried out by a judge of the supreme court within the next ten days.

At the time of Judge Taylor's decision, Mr. Delisle announced his intention of appealing.

Mr. Delisle first entered the legislature at the 1926 general election when he defeated Joseph M. Dechene, Liberal, who in the recent election reentered the house by defeating Laudas Joly, U. F. A. sitting member.

## OIL PRODUCTION IN ALBERTA

May, 1930, Output is Slightly Higher Than For Same Period Last Year

Alberta's output of oil during the month of May of this year was slightly higher than that for the corresponding period last year according to figures compiled in the Department of the Interior from the reports of operators. The 85,483 barrels of naphtha produced came from the lime formation in the Turner valley, 39 wells contributing the total. The light crude came from higher horizons in Turner valley and from the Red Coulee field. The total production of light crude was from 10 wells, three of which also produced naphtha. Four thousand seven hundred and ninety-seven barrels of light crude were produced in Turner valley in May, 1930. The heavy crude total consists of the output of five wells in the Wainwright field, one in the Ribstone field, and one in the Skiff area.

The comparative figures follow:—

	May 1930	May 1929
Nap. Crude Crude Tot. (brls)	85,483	75,440
Light Crude Crude Tot. (brls)	2,115	95,227
Heavy Crude Crude Tot. (brls)	82,240	6,926
	1,010	90,185

## The Wastebasket

Heard at the poker party: "I and my wife are one." "Well, I and my wife are ten. She is the one and I'm the cipher."

"See that the soup is good and hot and that the glass of milk is good and cool, coffee real hot and bring me a glass of cold water with no ice in it," said a travelling man in a restaurant at Holden when giving an order the other day. "What do you take me for?" asked the waitress "a trained nurse?"

"Isn't this an ideal place for a picnic dinner?" exclaimed a local lady while on an outing at a lake near here. "It must be," her husband replied, "fifty million insects can't be wrong."

If the Bennett government ever needs a real diplomat it can find one in a young fellow at Jarro who was entertaining a widow there one evening last week and she asked him to guess how old she was. When he hesitated she said: "Why do you hesitate? You must have some idea." "Well, I have several ideas," he replied, "and the reason I hesitate is because I hardly know whether to make you ten years younger on account of your looks, or ten years older on account of your brains."

The trouble with the voice of conscience, says a careful observer, is that it gets so still and small with a lot of people that it would have to learn the deaf and dumb language to reach them.

"You say your married life has caused you to stop swearing?" asked a minister at Lavoy of a new member of his church. "Yes, children around the house, you know," was the reply. "Well, it is a bad example to set," remarked the minister. "It wasn't that. I just couldn't compete with 'em," the man replied.

Heard at the dance: "When that Killam fellow proposed and I accepted him he said he was in the seventh heaven." "Yes, I've heard he has been engaged to six other girls before."

One of the business places in our village has a sign which defines a good days work as follows: "Minding your own business in the forenoon and letting other peoples' business alone in the afternoon." Most people could profit by its use.—Dan's Review.

## Luck in Harvest Time

When bad weather comes at harvest time, and you have to wait until your grain dries out—that's hard luck.

But when your tractor breaks down on a busy day in harvest season, and you have to keep a combine and several men idle while you're waiting for repairs—that's just the penalty for not buying the right tractor.

The Oliver Hart-Parr keeps going, keeps the combine moving and the grain flowing to the grain tank. The best luck you can have is a dependable Oliver Hart-Parr to speed your harvesting.

Ask any owner of a Hart-Parr. Let him tell you why his Hart-Parr tractor has made him money. There's a reason why Hart-Parr tractors give continued satisfaction after five, ten and even twenty years of hard service. Under the Oliver Flag, such service is common.

### Planning, Saving, Investing

"To have AND to hold," when applied to money, does not seem to be an easy lesson for most people to learn. The word "and" is stressed because during the recent stock market slump there have been millions who have failed to do the "holding." They have emerged as losers. They have allowed the lure of speculation to divert their time and attention from their regular occupations and interests to a field of activity about which they knew next to nothing. So it seems that most of us need to concentrate more on the "holding" part of our financial plan.

So writes Leroy D. Peavey, president of the well known Babson's Statistical Organization, who, from an income-producing point of view divides the average individual's life into roughly three parts. The first, from about age twenty to age thirty, might be called the period of preparation or getting settled. The second, from thirty to the late fifties, is the period of accumulation. The third, from the late fifties on, is the age of retirement or at least of lessened earning power.

No matter how much time and money may be expended during the teens and twenties in preparing young people for their life work, they can never, says Mr. Peavey, be independent during the last period of life unless they have made good use of those twenty-five or more golden years in the second period. It is during this period of accumulation that one's surplus must be built up and judiciously invested if one hopes to be independent the rest of his days.

His watchwords should be Plan, Save and Invest. Planning means the making and using of a budget. The budget is the floor-plan of your financial structure. Fit it to your own situation and then stick to it, instead of shelling it after a couple of trials. Of what good are blue prints if the structure does not grow up in accordance with their specifications? And one of these specifications will be the proportion—whatever it may be—of your income that is to be set aside as savings. Another specification will be the determination to have a home of your own some day—one that eventually will be free and clear. Because it is free of mortgages or other claims, it will stand between your family and distress. Life insurance and other sound investments should likewise be included.

The second watchword, "Saving," has been brought to the consciousness of the people of this generation by many years of educational effort. It has been adopted by hundreds of thousands of Canadians as evidenced by savings accounts in post offices and banks. It was given a great impetus during the war when, through the urge of patriotism and in response to the call to sacrifice to "win the war," thousands of people who never before had invested in a bond bought Victory Bonds, and thus learned the lesson of how easy it is for money to accumulate and multiply itself through interest payments. But the lesson of saving is one that must be taught to each successive generation, and there should be no slackening in the effort. It is a lesson that all parents should see their children learn early in life and continually practice until the savings habit is formed.

When it comes to "Investing," you have the choice between invoking the almost unbelievable power of compound interest, or the more limited power of regular monthly savings, on the one hand; on the other, putting the money into well seasoned securities. In the first case you need no particular advice, for in its operation compound interest is both tireless and automatic. In the second instance, that is, with investment securities, you need advice of the most discriminating sort. This fortunately, you can easily obtain from your own banker.

You will want to have among your investments some good sound bonds anyway, and then if your available funds permit, some of the best stocks. The latter should be bought outright and never on a shoestring margin. Remember this, too. It is wise to keep a part of your funds in liquid form,—that is, in cash or such short-term securities as can quickly be converted into cash. Then you will be prepared for emergencies. You might need this money for a personal emergency, or for some special investment bargain in the market that had come to your attention.

The point is to put each spare dollar to work, twenty-four hours a day and each day in the year, earning more income for you. Your ability to "spare" these dollars for such a proposition will lead to a surprising increase in your "sparing" power; that is your ability to save. You will be able to see with your own eyes the rising structure of financial independence that is going to stand you in such good stead later in life. But in order that your future income may be ready when you need it, start to build that income NOW.

The word "investment" should be broadly interpreted to include not only bank accounts and securities, but insurance policies, your own home, real estate, mortgages, and other forms of capital. Life insurance is indeed important. It not only helps people to save, but it is a protection as well as an investment. Every person should carry life insurance, but, on the other hand, it is not the part of wisdom to place all your earnings in life insurance. Follow instead the practice of diversifying your investments—part in a savings account, part in life insurance, and part in sound securities.

However, this advice about investing is almost valueless if it is to be only a temporary effort, or if you allow your investments to be frittered away through carelessness or the greed for more. Rather turn to the fundamental sources of assured income.

And, above all, turn to hard work, initiative and perseverance, as the right means of accumulating sufficient funds for your needs, rather than the purely speculative stock market in the hope of getting something for nothing. Lastly, carry out the principle that "godliness with contentment is great gain," in your finances as well as in the rest of your life.

### Huge Power Projects

#### Millions To Be Spent In Next Three Years On Hydro Development

More than \$100,000,000 will be spent in each of the next three years on power projects now under development in Canada. Although there are other plans for important building projects, none will have a more intimate bearing upon the industrial development of Canada than those now contemplated by the power industry. The present turbine installation in the Dominion averages 583 horse-power per thousand of population, a figure which places Canada among the leading countries of the world in per capita utilization of water-power. The total installation now amounts to over 5,700,000 horse-power and an additional installation of over 3,000,000 horse-power will probably be made within the next five years. Quebec has the largest installation with an average of nearly one horse-power per person. Ontario has a total installation of nearly two million horse-power, and in 1929, the power companies in that province generated over six billion kilowatt hours, or more than one-third of the total produced in the Dominion. Manitoba has an installation of over 300,000 horse-power, and Alberta, 70,000 horse-power. On the Pacific coast, large resources are available and turbines with a capacity of 500,000 horse-power have been installed in British Columbia.

### Is Baby Teething?

Teething time is a time of worry to most mothers. The baby is nervous, fretful, feverish. His little gums are swollen and sore; diarrhoea, constipation, colic and sometimes convulsions set in—neither baby nor mother can sleep.

These troubles can be quickly banished, however, through the use of Baby's Own Tablets concerning which Mrs. Louis Grubb, Teeswater, Ont., says:—"I have used the tablets for all my babies while teething and have found them a splendid medicine."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Russian Laws On Religion

#### Teaching Of Religion In Schools Is a Punishable Offence

Extracts from the Russian laws on religion, compiled by the British embassy at Moscow, were issued in an official government "white paper."

The publication was in fulfillment of a promise given to the Conservatives by the Labor Government last April, when groups in Great Britain and other nations were protesting against alleged religious persecution in Russia.

The "white paper" cites a provision of the Soviet constitution providing for the separation of church and state, and of schools from church, while equally guaranteeing liberty of religious belief and freedom of anti-religious propaganda.

It also quotes a provision of the criminal code by which the teaching of religious beliefs in schools to young children and persons under age is punishable by a year of compulsory labor.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

### B.C. Hydro Development

Possibility of developing 3,000,000 horse-power from rivers along the coast district of British Columbia is disclosed by engineers.

### First Transcontinental Levels

The first Canadian transcontinental line of precise levels was completed by the Geodetic Survey of Canada in 1916.

### TWICE BENEFITED BY SAME REMEDY

#### Recommends Lydia E. Pinkham's Vegetable Compound

Cobourg, Ontario—"Years ago when I had a sick father and a nursing baby to care for, I got all run down and I took Lydia E. Pinkham's Vegetable Compound to get strength to do my work. Another item of Change of Life, I had severe headaches and felt tired all the time. I took seven bottles of the Vegetable Compound and felt like a new woman. I recommend it to any woman who is at the age when she needs building up."

—Mrs. T. E. STEWART, R.R. 4, Cobourg, Ontario.

### Good News For Students

#### Would Curtail Homework and Examinations For Vancouver High Schools

Curtailment of home work and abolition of examinations for Vancouver high schools is being considered by educationalists here this summer, with a view to lightening school-work for children and, at the same time, increase the efficiency of study.

With the inauguration of the new four year high school matriculation course at the commencement of the fall term, home work will be cut in half. It is declared by principals of several high schools.

Resentment against home work which has been sweeping the country in the past few weeks is steadily increasing, both among parents and teachers who declare that the old fashioned idea of giving children enough work to keep them out of mischief is not raising the standard of education. With science investigating every branch of life for the purpose of simplifying living conditions, education, it is claimed, has stood almost still in spite of the efforts of psychology experts.

### Recipes For This Week

(By Betty Barclay)

#### GINGER BREAD

2 cups sugar.  
1 cup butter.  
1 cup molasses.  
4 eggs.  
1½ quarts flour.  
1½ tablespoons soda.  
1 tablespoon ginger.  
1 tablespoon cinnamon.  
2 cups sour milk.  
1 teaspoon salt.

Cream butter and sugar; add well beaten eggs and molasses. Sift dry ingredients together and add alternately with milk. Bake in layer cake pans about 35 minutes in slow oven or about 325 degrees Fahrenheit. Cut in squares and serve with whipped cream.

#### ORANGE CARAMEL

6 oranges.  
½ cup sugar.  
½ cup water.  
½ cup cream.  
Pistachio nuts.

Pare oranges, removing membrane with peel, and cut crosswise. In small saucepan, add sugar, water and a small saucapan, and boil quickly until syrup is a golden brown. Arrange layer of orange slices in glass dish; sprinkle with sugar; pour over enough of the syrup to form a thin coating over the orange; add another layer of orange and syrup; repeat until all orange is used. Beat cream until stiff, pile lightly on the orange, and sprinkle with chopped pistachio nuts.

Many infants are infested by worms which cause great suffering, and if not promptly dealt with may cause constitutional weaknesses difficult to remedy. Miller's Worm Powders will clear the stomach and bowels of worms and will so act upon the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

### Military Promotion

#### Western Officers Appointed To Command Of Regina and Calgary Regiments

Promotion of Major E. R. Knight to the rank of Lieutenant-Colonel, and to command the Calgary, Alberta, regiment, was announced recently at the Department of National Defence. It was also made known that Lieut.-Col. J. McArthur was appointed to command of the Third Reserve Battalion of the Regina Rifles Regiment.

Both officers have had long service in the Canadian Militia. Lieut.-Col. Knight proceeded to England with the 56th Battalion, C.E.F., in March, 1916. He served in France and Belgium. Lieut.-Col. McArthur went overseas with the 38th Battalion, in May of 1915. His service also was in France and Belgium.

### Pioneer Mountie Dies

Peter O'Hare, 77, pioneer mounted policeman of the west, died recently at Maple Creek. Since the earliest days of the police in Saskatchewan Mr. O'Hare was associated with all activities, taking part in the Riel Rebellion engagement. His service extended over 40 years.

### Crude Oil Consumption

At present only about 2½ per cent. of our crude oil consumption is produced in Canada.

Trans-Atlantic telephone service has been extended in Sweden, so that it is possible to talk to people within the Arctic Circle.

Minard's Liniment removes Warts, relieves Bunions.

**ENO'S "FRUIT SALT"**

**Doctors Warn Against Drastic Purgatives**

Physicians know the danger of using cheap cathartics that create a harsh, unnatural intestinal activity. They know that ENO'S "Fruit Salt" is more than a laxative. It is a delicious health beverage that sweetens and tones up the entire system—and that its daily use—just a dash in a glass of water, every morning—is an aid to vigorous good health.

### Report On Gas Fields

#### Member Of Geological Survey Of Canada To Make Report On Saskatchewan

Dr. G. S. Hume, of the Geological Survey of Canada, will make an immediate survey from all available data, of the prospects of finding gas in Saskatchewan, in suitable quantities within the province.

He will not make any actual investigation in the field at the present time, but having visited each city interested in gas development and gathered material from other sources will make a report based on geological information already obtained by various survey parties.

This report, framed as it affects the various cities interested, will be submitted to the Dominion Government, which in turn will forward it to the provincial government. The joint committee, representative of four cities of Saskatchewan interested in the gas question, will then be put in possession of all the facts obtained.

This was the outcome of a conference held at the parliament buildings, in Regina, where Dr. Hume met five members of the Saskatchewan Government and also of the four-cities gas committee.

Soft corns and warts are ugly, painful and irritating. Remove them quickly and surely with Douglas' Egyptian Liniment.

### Encourage Sheep Industry

#### Economic Survey Of Sheep Ranches Of Western Provinces To Be Undertaken

An economic survey of sheep ranching in Saskatchewan, Alberta and British Columbia, is being undertaken by the Dominion Department of Agriculture, under the direction of the agricultural economics branch in co-operation with the Dominion Experimental Farms. This is the beginning of a programme of research work in agricultural economics on behalf of the livestock industry.

The Yungas Railway, of Bolivia, is erecting steel telegraph poles.

### No Cause For Alarm

#### Says Russia Will Not Be Factor In Wheat Exportation For Some Time

Thomas D. Campbell, of Hardin, Mont., who has been called the world's largest wheat grower, returned recently from a trip to Russia as agricultural consultant to the Soviet, and announced that it would be longer than alarmists thought before Russia was a factor in any export field.

As the country's five-year program progresses, he said, the needs of the country also increase. The more she grows the more she consumes. It will be at least three years before the Soviet government is a factor in the export of grain or any other commodity. Very soon the internal needs of the country will call for 1,000,000,000 bushels of wheat annually, just as an example.

**A Corrector Of Pulmonary Troubles.**—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Honey has become so popular in the British Isles that while 1,100 tons were produced there in the last 12 months, fully 3,500 tons, valued at \$2,000,000, were imported.

The United States exported 25,707,854 sets of false teeth last year.

### The Handy Bottle

Minard's is the sure relief in the Handy Bottle. For strains, burns, bruises, boils and blisters.

# Plan For Wholesale Emigration From Britain As Solution Of The Unemployment Problem

Wholesale emigration under the direction of public utilities, which would be given special concessions for buying or leasing large tracts of vacant land which would be developed with the aid of the British and Dominion governments, is Labor's newest scheme for a solution of the unemployment problem which is costing Great Britain \$200 per minute.

Horace Greeley's "go west, young man" would become "go east or west" for the plan embraces all parts of the Empire. The idea will be brought up at the forthcoming Imperial Conference, in London, England, with the hope that the Dominions will approve the scheme and agree to a partnership with the Labor Government in finding a place for the more than 2,000,000 persons unable to find work in Britain.

Immigration question. Members of the plan is a new approach on the government feel that the old systems of homesteads and other piece meal movements of people were wholly ineffective and not wanted. The utilities would be given control they would only swell the ranks of untrained influx of British where they unemployed.

The scheme is therefore a pretentious plan to find a place for those at present unemployed and not wanted. The utilities would be given control in acquiring land and the development of virgin territories would be left in their hands. The British and Dominion governments would aid in carrying out a comprehensive plan to settle the new territory and emigrants would be furnished as man power for the markets needed to establish a new economic frontier.

The government is pushing the project for a new type of pioneer and the unemployment problem of the west claim the idea is a solution of Dominions as well, since the opened territory will be open to the world less there as well as England. It also claims that thousands are willing to leave immediately, but the uncertainty of unemployment holds them in England for their life.

It is understood that one Dominion has already endorsed the scheme. There is no anticipation of Britain or among the proponents trouble in finding investors in the event the plan is adopted.

## Saskatchewan Egg Pool

Higher Prices Obtained This Season Over That Of Last Year

An increase in prices over those paid for the same period of 1929 is noted in the final payment of the Saskatchewan Co-operative Poultry Producers Limited, or Egg Pool. It is claimed that these prices (extra 22 cents; first 19 cents; second 17 cents and extra 15 cents, net cash, 10.5 shipping point on freight shipments) are not only higher than at the same time last year, but are from one to two cents per dozen higher than those paid by any other commercial dealers in the province. The volume of business handled by the Pool has again increased by 18 per cent, following last year's gain of 58 per cent. over that of 1928.

## Ayrshire Breeders' Association

Ninety-Five Reports Of Cows That Qualified For R.O.P. Standing During June and July

During the months of June and July, the secretary of the Canadian Ayrshire Breeders' Association received 95 reports of cows and heifers that had qualified in the R.O.P. — 33 in the 265 day class, and 62 in the Honor Roll or 305 day division. In the former, 13 qualified in the mature class; 4 in the four-year-old; 5 in the three-year-old, and 9 in the two-year-old class. Twenty-seven of these records were made on two milkings a day.

(By Anabelle Worthington).

2551

## To Relieve Unemployed

Nearly 12,000 Extra Men Engaged By C.P.R. On Improvements From Coast To Coast

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway's programme of construction, maintenance and improvement, from coast to coast. Construction work of all kinds is being done both directly by the company and also by contractors, the company itself employing some 8,000 men in "extra gangs" throughout its system. The varied programme includes the laying of branch lines; repairing and renovation of right-of-way, bridges, tunnels, stations, and other buildings. The men, in general, are recruited as near as possible to the scene of work and kept steadily employed until each job is finished.

## Increase Wheat Duty

An increase in duty on wheat imported into Italy put into effect recently in order to safeguard the farmers of the country from unprofitable prices has been reported by A. B. Muddiman, Canadian trade commissioner, in Milan, to the Department of Trade and Commerce. There is an official estimate of loss of about 1,000,000 tons of wheat in this year's harvest.

A motion picture screen which permits showing pictures outdoors and in lighted halls has been invented by two French engineers.

"I have lost my biggest creditor." "Is he dead?" "No, there was no help but to pay him."—Buen Humor, Madrid.

W. N. U. 1852

## BEATS YOUNGER MEN

One of the outstanding features of the sea fleet at Swatiga Beach, Puslinch Lake, recently, was the driving of Ald. William Marriott, of Hespeler, Ont., who not only won the local race in three straight heats from younger men, but stepped on up into the open competition of Class "C" and finished fifth in a good field of high-class and experienced drivers. Up and around Puslinch Lake Ald. Marriott is affectionately known as "OL BILL." He drives a real racing sea fleet outfit, and is not only a superb rough water driver, but he skims the buoys by a whisker and is not afraid to plow right into the turnoff at a big field. His work at the starts drew cheers every time he came up for the flag.

## Canada Holding Trade Position

Dominion Maintains Place Among Leading Trading Countries Of The World

Ottawa, Ont.—Canada maintained her position among the leading trading countries of the world in the fiscal year ending March 31, 1930, despite a sharp decline in export trade and a slight falling off in import trade. This is disclosed in the condensed preliminary report on the trade of Canada, 1930, issued recently by the Dominion Bureau of Statistics.

The year was marked by an unfavorable balance of trade of \$103,335,512 compared with a favorable balance the year before of \$123,216,984. This was attributed to the falling off in the export of grains, particularly wheat, to the United Kingdom and continental Europe. Due partly to lower yields.

Canada's total trade in the last fiscal year was \$2,393,212,000 compared with the total of \$2,654,575,000 in 1929, and \$2,359,555,000 in 1928. It is thus seen that while trade last year showed a falling off in comparison with the year before, it was still in excess of the total in the year ending March 21, 1928.

Imports last year amounted to \$1,248,273,582, compared with \$1,265,679,091 the previous year. The sharp decline in exports is indicated by the total figure of \$1,144,938,070, compared with the 1929 figure of \$1,388,896,075. The decrease in exports was \$243,958,005, and the decrease in imports was \$17,405,533, 17.6 per cent. for exports, and 1.4 per cent. for imports.

In export trade Canada leads the world in the export of printing paper, nickel, and asbestos; occupies second place in exports of automobiles, wheat and wheat flour, and fourth place in exports of wood pulp as well as a very high place in the world's exports of such staple products as lumber, fish, copper, raw furs, whiskey, meats, rubber tires, farm implements and raw gold.

## Interpreter Knows His Job

One of the busiest men in London this summer is W. Browthers, interpreter for a business company, who directs people in their own language. Besides English, his own tongue, he speaks German, French, Italian, Danish, Swedish and Japanese. "I can even talk American," he said, "which is just as well, for any number of Americans seem to think they need an interpreter in London."

## Asbestos In Manitoba

Valuable Mineral Located At Two Points In Northern Part Of Province

The reported discovery of asbestos at two points in Northern Manitoba may broaden the range of Manitoba's mineral wealth, but cannot affect the national leadership in asbestos production, which is already securely held by Canada. Canada produces about 74 per cent. of the world's supply of asbestos, Rhodesia about nine per cent., Russia about six per cent., and South Africa about six per cent., the remaining production being distributed in small quantities among other countries.

Asbestos, although a mineral, consists of silk-like threads which can be spun and woven much as a textile. On account of its fire-proof quality it is used extensively in building and in manufacturing Canadian shipments. In 1929, amounted to 306,055 tons, valued at \$13,172,581. An increase of 12.1 per cent. in quantity, and 17.2 per cent. in value over the previous year.

## Largely Self-Supporting

Many Canadian Industries Capable Of Supplying Home Market

According to figures issued by the Dominion Bureau of Statistics, the Canadian dairy industry provided over 98 per cent. of the 34,001,765 pounds of cheese consumed in Canada, in 1929, and two-thirds of the 299,348,271 pounds of butter consumed. Sugar consumption, in 1929, amounted to 944,963,712 pounds, of which 98 per cent. was refined in Canadian refineries. Salt consumption amounted 197,271 tons, of which two-thirds was Canadian-manufactured. Slightly over 50 per cent. of the 14,077,677 tons of coal made available to the Canadian public in the first six months, in 1930, was mined in Canada. The value of radios and radio parts made available to the Canadian public, in 1929, amounted to \$31,750,233, of which nearly 70 per cent. was manufactured in Canada.

## Put On Publicity Program

In a further effort to bring before the people of the province the great variety of the produce of farm and factory, the Made-in-Manitoba Committee of the Industrial Development Bureau, is staging an extensive publicity programme.

Sidewalk cafes have been introduced in Havana.

## PRINCE OPENS NEW WORKSHOP

The photograph above shows Prince George officially opening door of new workshop at opening of Papworth Village settlement, near Cambridge, England, recently.

# Valuable Resources Going To Waste As Vast Quantities Of Natural Gas Are Burned In Air

## Free Correspondence Courses

Educational Opportunity For Every Boy and Girl In Saskatchewan

Educational opportunity for every boy and girl in Saskatchewan is the ideal towards the attainment of which the provincial Department of Education is steadily working. Notwithstanding the rapidly growing system of secondary education in high schools, collegiate institutes and in elementary schools, these schools do not meet the situation fully. To supplement the work thus being done, provisions have been made by means of correspondence classes, to give a course of instruction to several hundred boys and girls who, for various reasons, have been unable to attend the public or elementary schools. The next step is the inauguration of correspondence instruction in high school courses. These courses are for the benefit of pupils who have no high school facilities, or who have such physical disability as would prevent their walking to school.

## Farm Boys and Girls

Canadian Juvenile Club Work Is Outstanding Among The Nations Of The World

"Canada stands second only to the United States in all the world, in the work she is doing for her farm boys and girls. Our juvenile club work is outstanding among the nations," declared F. W. Walsh, superintendent of agriculture for the Canadian National Railways, who has just returned from England, where he attended the royal agricultural show at Manchester, as coach in charge of the Canadian boys' cattle judging team which participated in the international judging contest in July.

During his trip, Mr. Walsh also attended the world's poultry congress in one of the Canadian delegates, and made a special trip to the continent to study phases of agricultural development there.

## Summerfallow Tests

Found To Be No Advantage In Plowing Deeper Than Four Inches

How deep should summerfallow be plowed? The answer to this important question in respect to prairie farming is provided by the Dominion Experimental Station, at Scott, Sask., where, after fourteen years of careful investigation, it has been found that there is no advantage in plowing summerfallow deeper than four inches, where a good job can be done at this depth. Not only is this sufficient for the proper retention of moisture, but a considerable saving in time and labor is possible, and it assists the work of cultivation for weed control. Plowing at depths ranging from three to eight inches was studied throughout the period of the test.

## Poultry For Profit

Importance Of Carefully Culling Flocks Before The Laying Season

The ten-year average of the cost of feeding laying hens at the Lennoxville Experimental Station, of the Dominion Department of Agriculture, is \$2.43 per hen. This means that with eggs selling at an average of 35 cents per dozen, it takes 6.75 dozen, or 81 eggs, to pay for the keep of the laying hen—only the eggs laid in excess of that number can count as a profit. This demonstrates the importance of carefully culling poultry flocks before the laying season begins. It is the hens that lay from 150 to 200 eggs a year that pay.

## Good Road Making Material

Met With Success In Extraction Of Tar From Sands In Northern Alberta

Success in the extraction of tar from bituminous sands in the McMurray area of Northern Alberta is said to have crowned ten years of effort on the part of D. K. A. Clark, of the University of Alberta. It is reported that 95 per cent. pure tar was taken from the sands in recent experiments and it is believed that thousands of dollars may be saved in road-building and other developments as a result of the availability of this material.

## First Picnicer

First Picnicer — "Isn't this an ideal spot for a picnic dinner?" Second Ditto — "It must be. Fifty million insects can't be wrong."

All airports in the United Kingdom now are government controlled

"Suppose by some accident, all the coal mines of Alberta should suddenly be set on fire, and before the fire were extinguished, a full year's output of Alberta coal should be destroyed. And suppose, while the fire were going on, that the government took no steps to prevent this gigantic loss. What an outcry would echo from ocean to ocean in Canada against such a national scandal. Yet, in another form, that is exactly what is taking place day by day.

Natural gas, more efficient for heating than coal, is being burned in the air in Turner Valley annually at a rate nearly equal to the entire Alberta production of coal in 1927.

In 1927, Alberta produced a total of 6,034,164 tons of coal. In 1929, Alberta burned, in the air, in Turner Valley, 108,500 millions of cubic feet of natural gas, equivalent in heating value to 6,570,000 tons of coal.

In 1929, Alberta coal production increased to 7,335,489 tons of coal. But, at the new wells are being drilled in Turner Valley, the natural gas which will be burned as waste there in the coming year, will exceed Alberta's banner year of coal production. These are not fanciful calculations. They are careful estimates, made conservatively, by gas and heating engineers. Enough natural gas went to waste in Turner Valley, between August 1, 1929, and August 1, 1930, to supply the needs of present Alberta users for 15 years. Assuming that Saskatchewan were to use eight billion cubic feet per year, as compared with Alberta's six and a half billion, enough gas went to waste in that time to supply Saskatchewan for 12 years.

Compared with coal, enough gas goes to waste in Turner Valley every day to equal nine train loads of high grade coal, each train being of 50 cars, and each car containing 40 tons. Thus, fuel equal to 18,000 tons of coal goes to waste. Multiply that by 365 for the total wasted each year and the figure looks like light years in connection with a star on the outer rim of the universe, 6,750,000 tons a year to be exact. The daily waste, on an average from August, 1929, until August, 1930, amounted to 300,000 cubic feet. Against this an average of only 20,000,000 cubic feet per day was used.

If these train loads of heat had been shipped out of Alberta just as her wheat is shipped, the railways would have to supply facilities for two-thirds more trains than in the biggest rush season of the year. Ordinarily about 600 cars of grain are inspected at Calgary daily following the harvest. At that rate, on the same basis, these cars would constitute 12 trains. Therefore it would work out to nine heat trains and 12 wheat trains per day.

But that is only part of it. The wastage between August 1, 1929, and August 1, 1930, on the same basis, would have wasted out 16 train loads of heat per day, so, in a like ratio, the wastage for that year was just two-thirds of the wastage figured out for the season 1929-30.

These figures have all been for the past. The future can hardly be guessed. At present 50 wells are producing, and it is possible that 250 similar wells could be brought in without difficulty. Then the figures would be just multiplied by five. And Turner Valley is only one valley. There are others with possibilities according to geologists and experts in the oil game.

## Canada Grows Fine Tobacco

Canadian Grown Tobacco Of Better Quality Than The Imported Leaf

Canadian farmers, consequent upon research work done by the Dominion Department of Agriculture, are now producing practically all the fine tobacco required by Canadian manufacturers, observes Dr. E. S. Archibald, Director of Dominion Experimental Farms, who adds that the quality is better than that of the imported leaf.

"Do you know what to look out for when fishing, sonny?" "Of course I do, the policeman."—Hummel, Hamburg.

## Quality Merchandise

### Womens' Hose Special

Womens Silk Lisle Hose in all the popular summer colors. Four ply heel and toe. Wide top, size 5 1-2 — 10.
